

WORKSHOP AIRPORT CAPACITY FORECAST

(SESAR WP E project)

23th of April 2015 (10:00 – 16:00)

Naples, Italy

Study to investigate airport capacity issues for the upcoming 48 hours

Dear madam/sir,

Capacity is one of the major steering parameters for airport operations. In situations of limited capacity, mitigating measures will need to be taken by all stakeholders in a coordinated way.

The workshop will present the results of the ACF-project, which focusses on runway capacity, security passage capacity and de-icing capacity:

- Solutions to determine capacity for the next 48 hours
- Presentation of coordinated capacity forecast (dashboard)
- Mitigating measures

The workshop will allow discussions on capacity forecast issues and will allow you to assess the operational benefit of capacity forecast through presentation at a dashboard. The workshop will be of interest to all airport stakeholders involved in planning of airport activities. Representatives from all airport stakeholders, including airlines, are welcome.

You are kindly invited to participate to the workshop. Participation is free of charge. Please register by e-mail to info@acf-project.eu.

On behalf of the ACF project team,

Henk Hesselink, NLR

Agenda ACF (Airport Capacity Forecast) workshop

The workshop will take place on:

April 23th, 2015

10:00 – 16:00

Location:

NAPLES

Italy

Agenda

1. Welcome and introduction
2. Presentation of Airport Capacity Forecast
3. Presentation of the three scenarios: runway, security, de-icing
4. Presentation of the dashboard
5. Discussion session: *operational use of the information at the dashboard*
6. Lunch
7. Discussion session: *capacity forecast and mitigating measures*
8. Wrap up and future steps

From participants we expect an active contribution to the discussion sessions and a preparation of the workshop, concerning specific airport scenarios relevant to airport capacity forecast.

Participation is free of charge. Please register by e-mail to info@acf-project.eu.
